

C2_00 Senior Analyst Foundations - Start Here RC4

Begin here before SAF1

Why this module exists: Course 1 taught analyst outputs. C2_00 adds the senior control layer: clarify the decision, define the metric and grain, validate independently, communicate uncertainty, and leave an inheritable handoff.

Exact learner route

1. Open the Astra RC4 Learner Book and complete SAF1. 2. Do only the matching practice sheet. 3. Save a genuine attempt. 4. Validate and explain back. 5. Open the protected practice review only after the attempt. 6. Close review and complete the changed retry. 7. Repeat through SAF8. 8. Complete the Mini-Lab. 9. Use Quick Revision. 10. Take the non-gating Module Test closed-book. 11. Open its protected review only after attempt. 12. Attempt Gate A independently. Gate B/C remain hidden fresh retests until explicitly assigned.

Do not browse: protected reviews or Gate B/C early. A filled workbook cell is not mastery. External videos are optional support and must never solve a protected assessment for you.

Files to open

Stage	File
Teach	01_TEACH/C2_00_SENIOR_ANALYST_FOUNDATIONS_TEACHING_BOOK_ASTRARC4.pdf
Practice	02_PRACTICE/C2_00_PRACTICE_WORKBOOK_RC1.xlsx
Mini-Lab	03_MINI_LAB/C2_00_MINI_LAB_METRIC_DISAGREEMENT_TEACHING_RC1.pdf + workspace
Revision	01_TEACH/C2_00_QUICK_REVISION_ASTRARC4.pdf
Diagnostic	04_ASSESSMENT/C2_00_MODULE_TEST_ASTRARC4.pdf -> protected review after attempt
Gate	Gate A workbook -> RC4 Gate A protected review only after attempt

Prerequisite, mastery and route boundaries

Assumed Course 1 knowledge: small-table cleaning/filtering; basic Excel/SQL/Power BI analysis; simple metrics and joins; ability to save and explain your work. Repair only the missing skill rather than restarting Course 1.

Tools: a spreadsheet application is enough for C2_00. No paid cloud tenant, database server or certification is required. The learner book remains sufficient if external media fails.

Course-position boundary: Course 2A remains optional. It is not a hidden prerequisite for the direct Course 1 -> Course 2B -> Course 3 DA-to-DE route.

Lesson mastery: genuine attempt + independent fresh task + validation + explain-back + post-review changed retry. Recognition/copying is insufficient.

Gate mastery: competency floor, not raw percentage. Any unresolved critical definition, grain, validation, evidence-strength or handoff failure blocks pass. Repair only the weak competency. Gate B/C are fresh full reassessments and never auto-open merely because Gate A was attempted.
