

C2_08 Senior Business Analysis & Communication - Start Here RC4

Astra-parity route: evidence, decision and uncertainty before polish.

Step	Action
1	Read one SBA lesson and reproduce its worked reasoning in the practice workbook.
2	Label observations, inferences, assumptions, limitations and recommendations explicitly. Never convert an unknown into a guessed fact.
3	For stakeholder conflict, record goals/non-negotiables/options and route the unresolved trade-off to the authorized owner.
4	Complete Management Review Mini-Lab -> Quick Revision -> optional non-gating Module Test.
5	Gate A Marketplace Sellers is normal. Gate B Inventory and Gate C Renewals are fresh reassessments only after targeted repair when assigned.

Protection rule

Save a genuine attempt before any protected review. Close the review, solve a changed fresh retry, and save that retry separately.

Decision-quality rule

A polished recommendation still fails if it hides material uncertainty, invents causality, silently overrides a non-negotiable constraint, or has no accountable action/owner/review rule.
