

C2_08 Quick Revision - RC4

Retrieval support after study; not a replacement for the learner book or saved attempt.

Lesson	Anchor	Minimum proof
SBA1	Discovery funnel	Decision/audience -> definitions -> constraints -> evidence -> open questions -> acceptance
SBA2	Professional pushback	Request -> underlying decision -> risk -> safer option -> owner
SBA3	Priority triage	Impact + urgency + confidence + effort/dependency + non-negotiables
SBA4	O/I/R ladder	Observation != inference != recommendation
SBA5	Executive summary	Headline -> evidence -> implication -> uncertainty -> decision ask
SBA6	Uncertainty map	Known / unknown / assumption / scenario or range / update plan
SBA7	Action contract	Action + owner + timing + impact direction + measure + review/stop
SBA8	Conflict table	Goals/non-negotiables -> conflict -> options -> decision owner
SBA9	Defense map	Claim -> evidence -> assumption -> challenge -> revision trigger
SBA10	Cross-team contract	Inputs/outputs/definitions/owner/deadline/failure/acceptance
SBA11	Change trail	Work item -> diff -> review -> validate -> document -> release
SBA12	Coach loop	Ask -> inspect -> hint -> learner repair -> teach-back -> changed recheck

Senior analyst check

Can you distinguish fact from inference, expose uncertainty, make trade-offs visible, name an owner, define a success/review rule and defend what would change your decision?
