

C2-04 Module QA Report

Advanced DAX & Reporting - beginner-first RC1 - 2026-09-10

VERDICT

PASS for available static, render, workbook-import, formula-scan and archive-CRC QA. Live Power BI Desktop and Service behavior is explicitly pending. Course 2A remains NOT FINAL.

LEARNER-FACING REBUILD

15 canonical lessons rebuilt into a 67-page teacher-led book using the full M01 grammar. Actual page starts reconcile 15/15 from DAX1 p6 through DAX15 p62. The old DAX1/DAX3/DAX11/DAX12/DAX14 page-route defects are removed.

PRACTICE / REVIEW

7-file practice-data pack, 15-lesson evidence workbook, Executive BI Release Mini-Lab, 16-page protected lesson review and six targeted remediation cards. The DAX15 lifecycle sheet generation warning was caught, corrected and re-inspected before packaging.

RUNTIME HONESTY

Static files cannot prove DAX evaluation, report interaction, RLS or Service lifecycle behavior. Desktop/Service execution remains a later runtime gate.

C2-04 QA - Gates, workbook and PDF evidence

What was actually observed

WORKBOOK QA

All five XLSX files re-open through artifact_tool with zero formula-error matches. Representative Mastery, RLS, Lifecycle, Mini-Lab Measure QA and Gate A QA ranges were rendered and visually inspected.

PDF QA

Eight pre-report PDFs totaling exactly 100 pages were rendered at 200 DPI. Preflight returned zero warnings and all contact sheets were visually inspected with no clipping, overlap, broken glyph or page-route drift observed.

DATA-ARCHIVE QA

Practice data = 7 files / CRC PASS. Gate A = 6 files / CRC PASS. Gate B = 5 files / CRC PASS. Gate C = 5 files / CRC PASS. No data archive is accepted merely because it can be opened; CRC is part of the release gate.

GATE FRESHNESS

A SaaS Revenue & Customer Success; B Support Operations; C Healthcare Network Performance. Each changes domain, fact/target/snapshot structure, security mapping and reporting decision. B/C remain protected full reassessments.

C2-04 QA - current sources, PL-300 and release boundary

Professional depth with current 2026 certification alignment

SOURCE / VIDEO QA

24 exact lesson/source rows across 18 unique URLs. Chandoo's DAX masterclass and current Microsoft DAX, report UX, accessibility, RLS, workspace and refresh references were rechecked on 2026-09-10. External required dependencies = 0.

PL-300 ALIGNMENT

The current Microsoft guide measures DAX calculations/time intelligence/model optimization, report interactions/accessibility, RLS, workspaces/apps/distribution/gateway/refresh. C2-04 maps 15 lessons to these current objectives while keeping professional practice broader than exam preparation.

MENTOR HANDOFF

The future common Mentor must open exact page/sheet/task, enforce attempt-before-review, changed retry and Gate state, and distinguish Desktop versus Service environment blocking. Target tabs remain Today | Learn | Course | Repair | Evidence | Jobs | Reports | Settings.

PARALLEL RULE

No shared GitHub or backup integration is touched. C2-05 starts only after final CRC/hash/re-extraction byte freeze.
