

C2-08 Senior Business Analysis & Communication - Start Here

Begin here before SBA1

WHY THIS MODULE EXISTS

Senior analysts create value before and after the query/dashboard: they clarify the decision, negotiate definitions, prioritize, communicate uncertainty, recommend action, handle challenge and improve team quality.

EXACT ROUTE

SBA lesson -> matching P_SBA workbook case -> save first response/evidence -> explain-back -> protected review -> close review -> changed retry. Repeat SBA1-SBA12. Then Management Review Simulation -> Gate A.

NO PERSONALITY BARRIER

You can be quiet or introverted and still be excellent at this work. The course assesses preparation, clarity, questions, evidence, decision records and review quality—not charisma.

C2-08 prerequisites and practice style

Write first; speak/role-play after you understand the structure

YOU SHOULD ALREADY KNOW

Basic data analysis/reporting and the technical concepts from prior modules. You are not expected to have managed people or stakeholders before.

YOU NEED

The supplied case/evidence workbook. Optional: phone voice recorder for 60-90 second defenses. No paid business-analysis course/tool is required.

RECOVERY

When a case feels like 'real-world knowledge' you do not have, do not guess industry facts. Work only from the case evidence and ask what information/owner you would need. Identifying the missing decision/evidence is itself a professional skill.

C2-08 mastery / Gate contract

No 'sounds professional' scoring and no percentage gaming

LESSON PASS

Fresh written response + evidence/decision logic + explain-back + changed retry. A polished memo with invented facts, hidden uncertainty or no decision owner is not mastery.

GATE A

Marketplace Sellers management review: discovery, contradiction, evidence language, priority, recommendation, executive summary and defense.

B/C RETEST

Inventory Replenishment / Customer Success Renewals. Different facts and stakeholder conflicts; B/C remain protected full reassessments.
