

C2-08 Protected Practice Review

OPEN ONLY AFTER THE MATCHING CASE ATTEMPT

HOW TO USE

Compare the quality of your reasoning, evidence and ownership—not exact wording. Preserve your first response. Close this review before changed retry. If the review gives you language you did not independently produce, that language is not mastery.

CRITICAL FAILURES

Invented facts; causal certainty unsupported by evidence; misleading metric compromise; material uncertainty hidden; no decision owner; recommendation has no executable action/measure; priority hides displaced work; defense bluffs unknowns; review misses critical data/grain failure; mentoring simply hands over the answer.

PROFESSIONAL SIGNAL

Clear communication is not about sounding senior. It is about making decision, evidence, uncertainty, trade-off, owner and next action visible to the right person.
