

Remediation 1 - Discovery / pushback

Use only for the weak competency

WHEN TO USE

You accept vague requests or challenge them without a constructive route.

TARGETED REPAIR

Use a changed Finance request. Write six discovery anchors, playback summary, then push back on one unsafe metric with evidence/options/owner.

PASS SIGNAL

Pass when decision/definition/acceptance and professional alternative are explicit.

Remediation 2 - Priority / conflicts

Use only for the weak competency

WHEN TO USE

Priority follows loudest stakeholder or conflicting definitions are silently blended.

TARGETED REPAIR

Use 6-request backlog plus Finance/Sales metric conflict. Show displacement, non-negotiables, options and decision owner.

PASS SIGNAL

Pass when chosen and deferred work plus definition ownership are visible.

Remediation 3 - Evidence / uncertainty

Use only for the weak competency

WHEN TO USE

Inference is written as fact or caveats are vague.

TARGETED REPAIR

Rewrite a changed case into O/I/R statements, competing explanations, uncertainty scenario and revision trigger.

PASS SIGNAL

Pass when causal language and confidence match evidence.

Remediation 4 - Executive recommendation

Use only for the weak competency

WHEN TO USE

Summary is long/chronological or recommendation is vague.

TARGETED REPAIR

Write 100-word decision-first summary plus action/owner/timing/impact/guardrail/review rule.

PASS SIGNAL

Pass when manager can approve/reject without asking what to do.

Remediation 5 - Defense / cross-functional

Use only for the weak competency

WHEN TO USE

Questions cause bluffing or handoffs lack ownership/evidence.

TARGETED REPAIR

Prepare 6-question defense and RACI/contract for Finance, Operations, Analyst and Data Engineering.

PASS SIGNAL

Pass when unknowns, owners and acceptance tests are clear.

Remediation 6 - Review / mentoring

Use only for the weak competency

WHEN TO USE

You fix junior work yourself or review only style.

TARGETED REPAIR

Review a changed grain/failure bug. Mark BLOCK/COACH, ask guiding questions, require repair evidence, changed retry and teach-back.

PASS SIGNAL

Pass when business risk is contained and learner does the reasoning.
