

C2-09 Final Gate A - Subscription Services

Fresh integrated Senior/BI capability assessment

DECISION

Where is reported growth economically healthy, where is it fragile, and what action should leadership take next quarter?

DEFINITION / OPERATING CONFLICT

Sales uses booked subscription value | Finance uses invoiced/collected cash | Product uses active subscriptions/customer health Injected failure: 07:00 semantic-model refresh used only payments_on_time_feed.csv; late batch arrived 08:10. Technical refresh was green but collections were incomplete.

INDEPENDENCE

This is not Meridian repeated. Use only this case packet and your own reasoning. Protected reviews remain closed until the complete Gate attempt is saved.

Final Gate A - Required evidence

All critical floors, no percentage gaming

PART A - ANALYTICAL ARCHITECTURE

Clarify decision/definitions; state source/fact grains; design one high-risk SQL KPI plus independent validation; model relationships/date roles + two DAX/KPI measures; one automation/reproducibility component; warehouse/cloud/Fabric/access implications.

PART B - TRUST / OPERATIONS / COMMUNICATION

Blocking/warning checks and source-to-published reconciliation; recover injected failure; explain safe retry/idempotency; <=8-line executive summary with action/owner/limitation/next evidence; handoff/runbook; defend one rejected alternative.

CRITICAL PASS RULE

Any unresolved grain, validation/reconciliation, security/privacy, truthfulness, independent reasoning or unsafe rerun failure blocks the Gate. Final Gate pass still does not automatically unlock DE training.
