

C2-09 Module QA Report

Capstone, Promotion & PL-300 - Beginner-First RC1 - 2026-09-11

VERDICT

PASS for available module-level static, 200-DPI PDF, workbook, archive, route and assessment-integrity QA. C2-09 is ready for byte freeze. Course 2A itself is NOT FINAL because unified Mentor and whole-course simulation remain pending.

TEACHING REBUILD

CAP1-CAP14 now use a 63-page teacher-led core book; PL1-PL8 use a separate 39-page optional certification book. Exact lesson starts reconcile 22/22. PL-300, promotion/job-switch and DE-transition status are explicitly separated from core C2A completion.

REAL DEFECTS CAUGHT BEFORE FREEZE

QA caught and corrected two issues: malformed citation-marker glyphs in the first PL supplement render (full book regenerated) and a C2A-to-DE readiness formula placed on the wrong result row (logic repaired and rerendered). Neither defect is present in the freeze candidate.

C2-09 QA - Capstone, assessments and artifacts

Independent evidence and changed reassessment

MERIDIAN CAPSTONE

Authoritative Meridian data ZIP remains byte-identical to baseline: 11 members, CRC PASS, raw-control audit PASS. Core capstone provides contracts, evidence workbook, criterion rubric/review and interview/career artifacts but no solved SQL, PBIX, Python or executive recommendation.

FINAL GATES

Gate A Subscription Services, Gate B Healthcare Network Operations, Gate C Logistics Marketplace. Each changes domain, grains, definition conflicts and operational failure. B/C remain protected fresh reassessments. Critical grain/reconciliation/security/privacy/truthfulness failures cannot be averaged away.

PL-300 ASSESSMENT

40 original course-written questions: 11 Prepare + 11 Model + 11 Visualize/Analyze + 7 Manage/Secure. Changed retest: 20 unique items, 5 per domain. Answer keys contain unique IDs and only A-D values. Protected rationales open only after saved attempt.

C2-09 QA - Rendering, workbooks and release boundary

Current PL-300 sources rechecked 2026-09-11

PDF / WORKBOOK QA

17 learner/protected PDFs totaling 187 pages rendered at 200 DPI; full contact-sheet inspection and text scan are clean. Seven XLSX files reload through artifact_tool with zero formula-error matches after the readiness repair; representative dashboards, validation, PL and Gate ranges render cleanly.

CURRENT PL-300 LOCK

Official English skills measured as of April 20, 2026: Prepare 25-30%, Model 25-30%, Visualize/Analyze 25-30%, Manage/Secure 15-20%. Microsoft states 700+ scaled score for the real exam. Internal 80%/70% thresholds are clearly labeled only as course readiness heuristics.

COURSE / PARALLEL BOUNDARY

Course 2A remains OPTIONAL. PL-300 is OPTIONAL. C2A transfer-readiness evidence cannot unlock C3 by itself; direct route remains Course 1 -> C2B Bridge -> C3. Shared GitHub/backup was not modified. Next gate is unified Course 2A registry + Mentor integration.
